PROFESSIONAL SUMMARY

Senior Full Stack Developer and emerging Software Architect with 5+ years designing and delivering scalable web and mobile products end to end. An engineer who starts with the problem, not the code: I focus on client needs first, then build solutions that are effective, scalable, and efficient. I currently co-lead a multi-brand design system and the integration of AI into the development lifecycle, while working as Scrum Master and Product Owner. Strong in design systems, cloud (Azure, GCP, AWS), and AI-powered developer tooling. Master's in Website Engineering & Management (Universidad de La Rioja). English C1-C2.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C#, C++, Java, PHP, SQL, HTML5, CSS3

Frontend: React, React Native, Angular, Blazor, Design Systems, Design Tokens

Backend: Node.js, Express, ASP.NET, MVC, REST API Design

Databases: PostgreSQL, MongoDB, SQL Server, Firebase

Cloud & DevOps: Azure, GCP, AWS, Terraform, GitHub Actions, Azure DevOps, Jira, CI/CD

AI & Tooling: MCP Servers, LLM Integrations, AI Copilots, OCR

Practices: Agile / Scrum, Scrum Master, Product Owner, Architecture & System Design

PROFESSIONAL EXPERIENCE

TELUS — Senior Software Developer

September 2021 – Present | Guatemala (Remote)

- Co-lead the architecture of a multi-brand design system (React and React Native) that powers web and mobile products across 3 brands; own the design-token architecture and patterns that keep them consistent at scale.
- Drive the integration of AI into the development lifecycle and lead the end-to-end design and implementation of web products, instrumenting product analytics to guide decisions.
- Build and ship products across Azure, GCP, and AWS, with CI/CD pipelines and infrastructure as code (Terraform).
- Serve as Scrum Master and Product Owner, owning backlog, ceremonies, and delivery while staying hands-on across frontend, backend, and architecture.

Conduent — Software Developer, Data Capture Division

September 2020 – September 2021 | Guatemala

- Designed and developed data-capture products for enterprise accounts, primarily UPS, digitizing and processing high volumes of physical documents.
- Built AI/OCR pipelines that improved processing accuracy and throughput by 75%.
- Designed and implemented backend REST APIs and delivered new frontend products in production.

Rafael Landívar University — Developer Technician

August 2019 – September 2020 | Guatemala City, Guatemala

- Developed web products across backend and frontend, designed relational databases, and built mobile applications for the university's platforms.

SELECTED PROJECTS

- **Multi-brand design system:** token architecture, patterns, and a component library keeping web and mobile products consistent across brands.
- **Intelligent AI support agent:** an autonomous agent that handles user and developer support from start to finish.
- **Semantic component search:** natural-language search that helps developers and AI assistants apply the right component correctly.
- **AI developer tooling:** chatbots, copilots, and instruction-to-code generation embedded into the development workflow.

EDUCATION

Universidad de La Rioja (Spain) — M.Sc. in Website Engineering & Management

2023 – 2025 | *Graduated*

Rafael Landívar University — B.Eng. in Computer and Systems Engineering

2017 – 2023 | *Graduated* · *Landívar Scholarship recipient*

CERTIFICATIONS

- Claude Certified Architect (in progress)
- Scrum Master + AI Certified
- Product Owner + AI Certified
- Microsoft Certified: Azure Fundamentals
- ISTQB — Agile Tester & Foundation Level
- JavaScript Certified
- Cisco — Cybersecurity (Intro & Essentials)

LANGUAGES

Spanish: Native · English: C1-C2 (currently studying at Academia Europea)
